

Course Number: GMCG00K

Course Title: Godzilla & King Kong: CA & the ADA in 2023. Volume 1: What You Must Know as an Architect and Engineer in 2023 and Beyond

Provider: GreenCE, Inc. | K066

Subjects Covered in Course: (Learning Objectives)

1. Identify the essential ADA requirements impacting architectural and engineering design in 2023 and beyond.
2. Apply accessibility standards to create functional, inclusive, and code-compliant spaces.
3. Recognize and prevent common design pitfalls that create accessibility barriers.
4. Use real-world case studies to inform practical solutions that enhance usability for all building users.

About the Author:

Brad Gaskins - Principal and COO of The McIntosh Group

Brad is a partner at The McIntosh Group and a leading expert on accessibility. He has approximately 30 years of experience practicing architecture. With expertise in the Americans with Disabilities Act and national building codes, Brad brings a unique and valuable perspective to The McIntosh Group's practice and clients. Based on his deep love and understanding of codes, Brad has been accused of sleeping with a code book under his pillow. Brad is a California Certified Accessibility Professional (CASP), ICC Certified Accessibility Inspector and a past Certified Building Official. Brad also serves on the Oklahoma Board of Licensed Architects and the National Council of Architectural Registration Boards. Helping people understand the real reasons behind compliance requirements and meeting them in a painless, efficient way drives his work.
