

Course Number: GMCG00L

Course Title: Godzilla & King Kong: CA & the ADA in 2023. Volume 2: Accessible Routes

Provider: GreenCE, Inc. | K066

Subjects Covered in Course: (Learning Objectives)

1. Explain how ADA requirements specifically apply to accessible routes, highlighting their critical role in enabling independent and equitable access for all building users.
2. Analyze and evaluate paths of travel, identifying potential barriers and applying design strategies that create seamless, navigable, and inclusive circulation throughout a building or site.
3. Define accessible routes in detail, including ramps, corridors, entrances, and other key elements, and understand how these components contribute to overall functionality and user experience.
4. Apply ADA-related terminology, standards, and best practices to real-world projects, ensuring that design decisions enhance accessibility, usability, and comfort for diverse populations.

About the Author:

Brad Gaskins - Principal and COO of The McIntosh Group

Brad is a partner at The McIntosh Group and a leading expert on accessibility. He has approximately 30 years of experience practicing architecture. With expertise in the Americans with Disabilities Act and national building codes, Brad brings a unique and valuable perspective to The McIntosh Group's practice and clients. Based on his deep love and understanding of codes, Brad has been accused of sleeping with a code book under his pillow. Brad is a California Certified Accessibility Professional (CASP), ICC Certified Accessibility Inspector and a past Certified Building Official. Brad also serves on the Oklahoma Board of Licensed Architects and the National Council of Architectural Registration Boards. Helping people understand the real reasons behind compliance requirements and meeting them in a painless, efficient way drives his work.
